

SUPPLEMENT FACTS

Serving Size: 3 Tablets

A proprietary blend of.....540 mg

Reduced Iso-Alpha Acids, Acacia Bark and Heartwood Extract (Acacia nilotica) Other Ingredients: microcrystalline cellulose, cellulose, stearic acid, croscarmellose sodium, sodium starch glycolate, silica, coating (water, hypromellose, medium chain triglycerides, hydroxypropylcellulose, and sodium copper chlorophyllin).

CAUTION: Do not use if pregnant, nursing, or if taking anticoagulants. If taking other medication, consult your healthcare practitioner before use. Keep out of the reach of children.

Take three tablets daily or as directed by your healthcare practitioner.

Insinase™

Recommended For: Increasing Insulin Sensitivity

Insinase features selective kinase response modulators (SKRMs)—RIAA and acacia—which have been clinically shown in a preliminary study at the FMRC* to improve fasting insulin and lipid parameters.

Ground-breaking preliminary research suggests that SKRMs modulate kinase signals in favor of good health.

Designed to modulate kinase signaling (within cells) in favor of healthy insulin function and blood sugar transport.

Balanced kinase signaling helps to maintain healthy blood sugar already in the normal range and triglyceride regulation.

Developed through the ExpresSyn® Process—which combines proteomic research, safety evaluations, and human clinical research to set a new standard of clinical certainty in nutritional supplements.
